

pH Primer Plus (Item #2433) *Alkalize the Body and Improve Brain Function*

Why Alkalize with pH Primer Plus?

Leading research is beginning to confirm that most common diseases are associated with having a body that is too acidic. Growing numbers of people are becoming unhealthy, primarily because the typical western diet is made up of foods and beverages which cause an acidic condition within the body. Stress and improper eating habits further add to an over-acidic internal environment, which becomes a perfect breeding ground for pathogens to flourish. pH Primer Plus is a highly alkalizing formula created to counteract acidosis and to release oxygen molecules for easy absorption into the body.

Our brain cells need 12 times more oxygen than other body cells. When we lack enough cellular oxygen it upsets the proper functioning of virtually every organ. Feeling tired or sluggish for several days in a row may indicate a lack of cellular oxygen and nutrition. Your brain usually suffers first with symptoms of cloudy thinking and short-term memory loss.

Taking a small amount of pH Primer Plus daily insures that all cells are receiving adequate oxygen. When the oxygen levels are adequate the cells are able to absorb minerals and other nutrients far more effectively. Oxygen is also an antibiotic, antiseptic and increases overall feelings of wellbeing without the side effects of drugs.

Dosage: Take 4 drops diluted in 8 ounces of water up to 4 times daily or as directed by a qualified health professional. **MUST BE DILUTED in Juice or Water.**

Ingredients Explained

pH Primer Plus is a harmless chemical preparation, not a drug. This solution is **NON-TOXIC** when used as directed. Always seek advice from your health care professional before using this product.

pH Primer Plus stabilized oxygen is an oxidant similar in effect to Hydrogen Peroxide, but is more stable, because instead of releasing gas in the stomach, they react with the stomach acid, and release "molecular" oxygen. Even though pH Primer Plus is many times more effective than hydrogen peroxide as an oxidant there doesn't seem to be any nauseous feelings or unpleasant taste from the pH Primer Plus.

The reason we believe that pH Primer Plus works so well is the specific "enzyme enhancing" qualities of the chlorite ion. Chemically speaking, the chlorite ion is a molecule of chlorine and oxygen with a strong negative charge. The same molecule with a neutral charge is chlorine dioxide, an even more potent oxidizer and a super effective killer of microbes.

A prevailing belief is that if a person could maintain a robust cellular oxidation, meaning that virtually every cell in your body is functioning well, disease conditions don't have a chance. We believe that when our cell oxidation is diminished, due to stress and pollution and junk foods, we are opened up to fatigue, degeneration, and sickness. pH Primer Plus provides your body with a remarkably stable form of chlorite, which is chlorine and oxygen. (This is not the unhealthy form of chlorine that we encounter in swimming pools; this is a stabilized form of pure chlorine and oxygen). Extra oxygen is released into your bloodstream, the dissolved oxygen is very beneficial to your metabolism. We believe the chlorite molecule is used by the body as a substrate for a number of important enzymes that help improve cell oxidation. Most people don't know it, but the most abundant element found in healthy human blood is chlorine, followed by sodium, calcium, magnesium, iron and so forth. Obviously your blood needs quality chlorine. The stabilized oxygen liquid in the bottle is highly alkaline, yet it seems to remain stable even after contacting the low pH of stomach acid.

Not only do you have a wealth of energetic dissolved oxygen to be immediately absorbed into the bloodstream, but you have the specific "oxidizer" of chlorite and chlorine dioxide destroying viruses, bacteria and protozoa.

Notes: To increase the effectiveness of this product, add some fresh squeezed lemon or lime juice then add a minimum of 8 ounces of water. Also, limit the consumption of alcohol, caffeine, simple sugars, and high proteins while taking this product.

Since this product is highly alkaline, do not take this product during meal-time. And as always limit the amount of liquid during meal-time (10 minutes before your 1st bite to 30 minutes after your last bite) so as not to dilute your digestive juices. This is the one time you want an acidic stomach. This will aid in digestion and minimize Acid Reflux.

Required FDA Statement:

The FDA has not evaluated these statements. This product is not intended to diagnose or treat any disease nor is this information intended to prescribe or diagnose in any way. Those who are sick should see a doctor. Neither the authors nor the owner directly or indirectly dispense medical advice or prescribe the use of these products as a form of treatment. We assume no responsibility if you prescribe for yourself without your doctor's approval.

**Please DO NOT modify levels of any prescribed medication
without first consulting your physician.**

Ordering Information

pH Primer Plus (*Item #2433*) is priced at only: \$27.50 for a 2 oz. dropper bottle
(***approx 225 servings***)

Conveniently Order On-line at: <http://UniversalFormulas.com>
