

Black Walnut Hulls (Item #3003)

For the Reduction and Elimination of Parasites in the Intestinal Tract

Why take Black Walnut Hulls?

Herbalists have traditionally used the husks as a nutritional aid for the intestinal system. It has long been considered one of America's most valuable native cathartics. It is also called an astringent because it is rich in tannin, a toning substance. Its properties also make an excellent vermicide, sudorific, antiseptic, and febrifuge. We use the green hulls of Black Walnut because the green hulls are significantly more potent.

Compromised health is a direct result of parasitical infestation in our bodies. Parasites live off our body's life-force and the sustenance that we ingest. In addition to a loss of nourishment and cellular damage, the toxicities produced by these creatures play havoc with our immune system and degrade the optimum health of their host. Sickness, disease, and numerous health challenges are the direct resultant of continued exposure and infestation. But parasites can be safely eliminated from the human body.

Black Walnut Hulls can help relieve an impacted colon. When your colon is impacted your body does not absorb the nutrients it needs, so it entices you to eat more than usual. Ridding your body of toxins and impacted waste will boost your metabolism and encourage your body to burn more calories while reducing cravings for bad carbs.

Dosage Take 1 to 4 vegi-capsules 3 times daily or as directed by a qualified health professional. Long-term use (more than 14 days) is NOT recommended

Ingredients Explained

Black Walnut Hulls - Black Walnut is a rich source of the trace mineral chromium and is also high in organic iodine. Its inner bark, leaves, fruit and unripened (green) husk are used in herbology. The tree grows widely in the western U.S. and Canada and is native to the hardwood forests of the Central Mississippi Valley and the Appalachian region of North America. It is a large tree and can sometimes reach a height of 100 feet and 4-5 feet in diameter.

There are benefits from the rich supply of organic iodine and tannins which contain antiseptic properties. It also provides an oxygenating effect which may help burn up excess toxins and fatty materials. It aids in regulating blood sugar levels, and has been used for herpes, impetigo, athlete's foot, ringworm and counteracts hemorrhoidal bleeding in the colon as well as:

- Parasites (intestinal worms)
- Ballooned or relaxed colon
- Constipation
- Diarrhea
- Sore throat, tonsillitis
- Warts

It has neither a strong taste or odor and is considered a mild enough herb to try for many disorders by those who are afraid of stronger herbs. For this reason it is very well tolerated by children.
