

Hawthorne Berries (Item #3014)

Have a Heart...? Have this Berry...

Hawthorne Berry has been used in Greek culture for thousands of years to treat a variety of health issues, and dates back to as early as the first century AD. Hawthorne berries were also used by Native Americans to treat such conditions which include the heart, diarrhea, female issues, and to heal wounds.

The herb has historically been used in Chinese culture to promote good cardiovascular health, as well as to treat stomach problems. The berries on this shrub are edible and have been known to be made into marmalade. Due to the beauty of the plant, as well as the edibility of the berries, the Hawthorne plant is often grown as lawn ornamentation.

Dosage: Take 1 vegi-capsule, 3 times daily or as directed by a qualified health professional

Ingredients Explained

Hawthorne Berries – Contain powerful antioxidants and natural bioflavonoids that support the health of the entire cardiovascular system. Hawthorne increases the body's ability to utilize oxygen and the heart's ability to utilize calcium. This herb can actually help regulate both high and low blood pressure, in addition to slowly breaking down cholesterol and fat deposits in the body.

Some of the possible benefits from taking Hawthorne Berries include:

- the bioflavonoids help to strengthen the contractive force of the heart and gently dilate and relax the coronary blood vessels, improving overall circulation
 - lowers high blood pressure and high cholesterol
 - enlarges blood vessels, thus strengthening the heart
 - builds up joint lining, collagen and spinal discs
 - supports weight loss programs by reducing water retention and expelling excess salt from the body
 - reduces nervous tension
 - alleviates insomnia
 - aids digestion
-
